

trafic

Trafic represents more than 20,000 non-food items of impeccable quality that are seasonal or permanently available, but also hundreds of batches of goods sold at the lowest prices on the market. This strategy of low prices and very wide range of products has allowed Trafic to support their growth resulting in a current total of 77 stores in Belgium, Luxembourg and Northern France.

THE NEEDS

- Clients Internet access
- Internal devices MPLS VPN access
- Clients Internet access out of the internal network
- Tight budget

THE SOLUTION

- Integration of LAN, WLAN and WAN infrastructures on a fully managed services model
- Manageable WiFi antennas providing both public and private secured network
- Single WAN DSL connection with dynamic bandwidth allocation per traffic type
- Ready for Free WiFi captive portal

THE RESULTS

- Internal business-critical access always with the minimum required bandwidth
- Clients have easily access to the Internet while staying outside the internal businesscritical infrastructure
